EXPLANATION OF TABULATED DATA ON FOLLOWING PAGES

Number of Teachers—In this column appears the number of teachers under the supervision of the superintendent, principal or head of department, after whose name the number is found. The number after the superintendent's name includes all teachers, supervisors and principals, exclusive of the superintendent; the number after the high school principal's name includes all high school teachers, exclusive of the principal; the number after the principal of a ward building includes all the teachers in the building, exclusive of the principal.

Enrollment—The number entered in this column indicates the enrollment in September, 1930, in grades and high schools in the entire district. The district number is indicated after the name of the school. The names appearing after subjects are those of high school or junior high school teachers, except in the cases of special departments such as art, music, etc. In these instances the teachers named may devote a part or all of their time to work in the elementary grades.

Accredited High Schools, 1929-30—High schools are accredited at the close of each school year for as many years' work as has been done under favorable conditions and according to standards for accrediting adopted by the State Board of Education. Schools are classified as follows: Approved; approved with warning; probationary; non-accredited (see pp. 65-67 for Standards for Accrediting). The accrediting of each school is indicated after the name of the school.

FIRST CLASS DISTRICTS

(A first class district is one which has a population of eight thousand or more; it employs a superintendent who has had at least five years' experience in public school work; it is controlled by a board of seven trustees.)

THIRD CLASS DISTRICTS

(A third class district is one which has a population of less than one thousand; it employs a principal; it is controlled by a board of three members. Many third class districts have several rural schools in addition to the school listed below. As these rural schools are supervised almost entirely by the county superintendents, they are not included here. The number of teachers listed below is in addition to the principal. Consolidated districts are indicated in each instance.)

COUNTY HIGH SCHOOLS

(A county high school is under the control of a principal; it is administered in most cases independently of any school district; funds for its upbuilding and maintenance are derived from a uniform county levy; the board of trustees consists of seven members, of whom the county superintendent is one and the remaining six are appointed by the county commissioners. The number of teachers listed is in addition to the principal.)

STANDARDS OF THE STATE BOARD OF EDUCATION FOR ACCREDITING HIGH SCHOOLS

Adopted July 7, 1930

1. The time for which schools are accredited shall be limited to one year.

2. Every accredited high school in the state, after September 1, 1930, shall keep a permanent record of each pupil's work and attendance, which shall be kept in a fire-proof vault or safe, preferably in the school building, but may be kept in a vault or safe in a bank, courthouse, etc.

3. Every accredited high school must teach a minimum of 170 days net in a school year.

4. No school which does not require fifteen units for graduation shall be accredited for four years' work. Sixteen units are recommended.

5. No school shall be accredited when any teacher, or teachers, including grade teachers, are selected without the recommendation of the superintendent of such school; in case there is no superintendent, the recommendation of the high school principal shall prevail, providing, that in districts of the third class, in the absence of the principal, the county superintendent's recommendation must be secured.

6. (a) It is recommended that the minimum attainment of superintendents, principals and teachers, shall be equivalent to graduation from a standard college requiring the completion of a four-year course of study of 120 semester hours in advance of a standard four-year high school course. It is further recommended that the minimum professional training of all teachers shall include at least fifteen semester hours in education. No school shall be accredited which does not comply with the laws of the State of Montana regarding the certification of teachers, providing, however, this recommendation shall not affect the renewals of contracts of superintendents, principals, and teachers now in service of the school; providing, further, that teachers of vocational subjects who meet the requirements as set up by the State and Federal Boards for Vocational Education shall be qualified to teach in their special fields.

(b) The practice of teachers being assigned subjects outside of their major or minor fields of preparation is discouraged. Assigning subjects to teachers who have had no college preparation in that field will be considered a violation of the standards and may endanger the accrediting of the school, except in the two-teacher school.

(c) After September, 1930, it will be the policy of the State Board of Education not to accredit schools which employ principals or superintendents who have less than ten semester hours in administration and supervision, in addition to the number of quarter hours of education required for a secondary state certificate, and who have had less than three years of teaching or classroom experience excepting in first class districts, where the term of teaching or classroom experience shall be five years. This shall be interpreted to mean the chief administrator of the school district. Men and women now in the administrative field with less than three years of teaching or classroom experience shall be allowed to continue.

(d) The tenure of teachers, principals, and superintendents shall be an important factor in the accrediting of schools.

7. The total daily teaching load:

   a. Inexperienced teachers should not carry more than four classes.
   b. Experienced teachers should not carry more than five classes.
   c. The addition of one class, in extreme cases, may not interfere with accrediting.
   d. Exception shall be made in cases where a teacher has more than one section in each subject, providing the teacher-pupil load is not too great. In isolated communities where the enrollment is small and a high school course should be offered, this rule may be suspended.

8. No two-year high school shall be accredited which does not employ at least one full-time teacher. No four-year high school shall be accredited which does not employ at least two full-time teachers.

9. The efficiency of instruction, the acquired habits of thought and study, the general intellectual and moral tone of the school and community are paramount features, and therefore, only schools which rank well in these particulars, as evidenced by rigid, thorough-going sympathetic inspection, shall be considered eligible for accrediting.

10. No high school shall be accredited unless high standards of work and attainment are maintained in the elementary schools of the district. Especially important are the quality of instruction, the certification of teachers, the number of pupils per teacher, the length of the school term and the number of teachers in the grades, as compared with the number of teachers in the high school.

11. Admittance to advanced standing of pupils from unaccredited schools usually tends to lower the standards both of the school from which they come and of the school which they enter. It is recommended that this practice be discontinued, except in the case of unusually well-qualified students.

12. Every fully accredited high school shall maintain at all times at least three years of English and require not fewer than three units of English in a four-year course. Four units of English as a requirement for graduation are recommended. The board will discourage the placing of more than one hundred students per teacher in English classes.

13. A year's work in American history and government equivalent to one unit of credit is required of every high school accredited for three or four years. No student who has not earned one unit of credit in American history and government may graduate from a three- or four-year accredited high school. A two-unit course in American history and problems of American democracy required in the eleventh and twelfth grades may be substituted for the requirement. (Adopted July, 1927.)

14. No school employing fewer than four high school teachers for full- or part-time will be accredited for more than two laboratory sciences given during any school year; high schools employing one teacher, full- or part-time, will not be accredited for more than one laboratory science a year.

15. No school employing fewer than four teachers of academic subjects shall be accredited for more than one foreign language.

16. High school periods shall be not less than forty minutes long, exclusive of the time used in passing between classes.

17. The following minimum time requirement for one unit of credit shall be adhered to rigidly; courses requiring fractional amount of time shall receive corresponding fractional amounts of credit.

Subjects	Mins. per week for 36 weeks Recitation	Laboratory
Academic subjects, such as English, history, language, mathematics, etc.	200	
Subjects such as science requiring recitation and laboratory	120	160
Subjects requiring no outside preparation		400

18. The laboratory and library facilities shall be adequate to the needs of instruction in the subjects taught.

19. The location and construction of the buildings, the lighting, heating and ventilation of rooms, the nature of laboratories, corridors, closets, water supply, school furniture, apparatus, and methods of cleaning shall be such as to insure hygienic conditions for both pupils and teachers.

20. No high school which has fewer than two recitation rooms in addition to the study room shall be accredited for four years of work, except in the case of isolated communities where the enrollment is small, when this rule may be suspended.

21. No accredited school with limited teaching force shall be permitted to add, without the permission of the accrediting officer, classes or courses which are not accredited.

22. After September, 1929, it will be the policy of the State Board of Education not to accredit high schools in which the average daily attendance of eligible high school pupils fails to reach the following minimum:

Type of High School	Average Daily Attendance
Two-Year	12
Four-Year	20

If, after careful investigation by the State Department of Education, it is found than an isolated community, because of location and lack of transportation facilities, cannot conveniently send their children to another high school, this rule may be suspended.

NOTE: A one-year high school shall be accredited only as a step toward a two-year high school. A three-year high school shall be accredited only as a step toward a four-year high school. Due consideration shall be given to enrollment in one- and three-year high schools.

23. In computing apportionment of money raised by county-wide tax for the support of high schools subtractions shall be made from teaching time and pupil attendance: (a) In all work not accredited, (b) Of all pupils residing outside the county, (c) Of all ineligible pupils.

The following classes of high school pupils are eligible to be counted for apportionment: (a) Those who have passed successfully the state eighth grade examination, (b) Those who have passed successfully the eighth grade examinations given by the superintendent of schools in systems permitted to give their own examinations, (c) All pupils sixteen years of age or over, who desire to enter for special courses and who have passed successfully an examination given jointly by the county superintendent and the principal of the high school. In apportioning county money, the county superintendent of schools shall count the attendance of eligible high school students who have been submitted under (a) and (b). He shall count those admitted under (c) only when they shall have been in attendance fifty days.

24. High schools shall be classified by the State Board of Education as follows:

a. Approved. A school which meets all standards fully will be classified as approved.

b. Approved with warning. A school which violates minor standards will be approved with warning.

c. Probationary. A school which violates a standard on which it was warned the previous year will be given probationary rating. The violation of more than two standards in one year will cause a school to be placed on the probationary list. A school submitting a report late or in incomplete form may be placed on the probationary list.

d. Non-accredited. A school which has been on the probationary list for three years and which does not meet the standards in the fourth year will be dropped. The violation of the same standards for two successive years without satisfactory explanation in writing, or the serious violation of several standards in one year may cause a school to be dropped.

e. Probationary rating will not interfere with apportionment of county money or with standing of pupils. A non-accredited school shall not share in the county money nor shall the work done by the students be recognized by the other high schools of the state.

25. An appropriate certificate signed by the Governor, State Superintendent of Public Instruction, and the State High School Supervisor shall be issued to each high school, showing the classification granted by the State Board of Education.

STANDARDS OF THE STATE BOARD OF EDUCATION FOR EXEMPTION FROM STATE EXAMINATIONS

Adopted September 20, 1926

(Schools meeting these standards are exempt from State seventh and eighth grade examinations for promotion to high school.)

1. No school shall be accredited which maintains a school term of fewer than 170 days net, exclusive of all vacations and holidays. The length of term of rural schools located within city districts shall be the same as the term of the city system.

2. The school premises, building and equipment must conform to the standards set for a superior rural school and must grade 90% perfect on these points.

3. The teacher in charge of the eighth grade must have at least a regular four-year high school education and two years of normal training, carrying at least 96 quarter credits or an equivalent amount of college or university work including 16 semester hours in education. At least three-fourths of the entire teaching corps of the elementary department of the system must comply with the same qualifications, and all teachers must be regularly certificated.

4. Only schools ranking well in teacher tenure, in discipline, instruction and general moral tone, as evidenced by the systematic inspection of any of the constituted authorities, shall be accredited.

5. Schools having no supervision, other than that of the county superintendent of schools, shall follow the State course of study and the periods per week for each of the following subjects shall be five: grammar and composition, reading, arithmetic, history, and civics or physiology.

6. Schools meeting the requirements will be accredited for the current year at the meeting of the State Board next following their recommendation by a constituted authority and will remain on the accredited list for that year, provided no standards are later violated.

7. No school shall be accredited unless the regular blanks furnished by the State Department for this purpose shall have been filled out and sent to the State Superintendent on or before December 1. All blanks shall call for training and tenure of teachers, daily program, and number of minutes per week given to each subject.

TEACHERS' RETIREMENT SALARIES

In accordance with an act of the legislature approved March 8, 1915, teachers who have taught thirty years, the last fifteen years of which have been in Montana, may retire on an annual retirement salary, the exact amount of which is determined by the amount of funds available. Those who were teaching in the State in March, 1915, when the law was passed, need to have only the last ten of the thirty years of experience in Montana.

School officials are required to deduct one dollar every month from the salary of every teacher in their employ for the benefit of the retirement salary fund. This applies to all teachers except those actually in the employ of the Montana schools on the date of the approval of the act, who were allowed until January 1, 1926, to decide whether to avail themselves of the law or not, and who did not agree to be bound by the provisions of the act.

MISCELLANEOUS

HIGH SCHOOL NORMAL TRAINING

High school normal training departments supervised by the Department of Public Instruction and receiving State aid are maintained in the high schools at Belt, Butte, Eureka (Lincoln County High School), Miles City (Custer County High School), Wibaux (Wibaux County High School).

STATE FLAG

The State flag of Montana is a flag having a blue field, with a representation of the Great Seal of the State in the center, and with a golden fringe along the upper and lower borders of the flag.

STATE FLOWER

The Montana State flower, adopted by act of the Legislative Assembly, approved February 29, 1895, is the Bitter Root (Lewisia redivia.)

STATE BIRD

During the school year 1929-1930, the meadow lark was chosen as the Montana State bird by a vote of 30,000 school children, representing rural and urban districts.

SALARIES AND LENGTH OF TERM

City and village schools open in September and remain in session nine or ten months. Rural school terms vary from six to nine months. The Department of Public Instruction cannot give any list of rural schools that will be in session during the summer. Such schools are found in a few counties. They usually open early in the spring and continue for a regular term until late autumn. Local conditions and judgment of trustees control the establishment of such schools.

Salaries of teachers in rural schools range from about $600 to $1200 annually; in towns and cities from about $900 to $1800.

No general statement can be made in regard to cost of teacher's board as the variation is great in different regions.

DEMAND FOR TEACHERS

The Department of Public Instruction receives many requests for teachers from city and county superintendents, principals of county high schools and boards of trustees. It is the policy of the office to refer those requesting teachers to the Boards of Recommendation of the divisions of the Greater University. These institutions graduated, during the year ending June 30, 1930, the following number of students fully qualified to teach in the public schools of Montana:

State Normal College, Dillon	183
Eastern Montana Normal College, Billings	102
State University, Missoula	112
State College, Bozeman	53
Total	450

Mount St. Charles and Intermountain Union, two private colleges located at Helena, are fully accredited by the State Board of Education. These institutions graduate candidates eligible to teach in high schools of the State.

FURTHER INFORMATION

A Circular of Information pertaining to teachers' certificates will be sent to any address upon request.

Any reasonable inquiries not covered by the information given above will be cheerfully answered.
